

Sai Shewale

✉ saishewale.31@gmail.com ☎ +91 9552477474 [in LinkedIn](#) [GitHub](#) 📍 Pune, India

Profile Summary

AI/ML-focused Computer Science undergraduate with hands-on experience building Agentic AI systems, RAG pipelines, and full-stack automation workflows. Skilled in LLM integration, multi-agent orchestration, and REST API development using Python, FastAPI, and n8n. Cloud-certified across AWS, Azure, and Oracle.

Education

B.Tech in Computer Science and Engineering (AI & ML) 2022 – 2026
DY Patil International University, Akurdi, Pune

Technical Skills

AI/ML & GenAI:	Machine Learning, NLP, RAG, LLM Integration, Prompt Engineering, Agentic AI Pipelines, Computer Vision
Languages:	Python, HTML, CSS, JavaScript
Libraries:	Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV, FastAPI
Cloud & Platforms:	AWS (CLF-C02), Microsoft Azure (AI-900), Oracle Cloud (AI Foundations), n8n, GitHub, MySQL
Tools & Other:	REST APIs, Multi-Agent Orchestration, Automation, OOP, JSON Pipelines, Excel

Internship Experience

AI Integration Intern May 2025 – Jul 2025
G. S. Moze College of Engineering

- Built Agentic AI workflows using LLMs, RAG pipelines, and FastAPI for end-to-end intelligent task automation.
- Developed a custom MCP server integrating multi-agent orchestration with JSON pipelines for context-aware responses.

Software & Automation Intern May 2024 – Jul 2024
Remsons Industries Ltd

- Built a Smart Gatepass System using MySQL, HTML, CSS, JavaScript with role-based authentication and tracking.
- Developed admin dashboard for reporting and filtering; automated assembly workflows with an Arduino LED prototype.

Projects

Intellect Code Visualizer — React, Spring Boot, FastAPI, Ollama, AI 2026

- Built an AI-powered platform that converts source code into explanations, flowcharts, narrated slides, and automated explainer videos using LLMs.

ExpenseMind AI — Python, Groq API, Streamlit, Plotly, Agentic AI 2026

- Built an Agentic AI expense analyzer using Groq LLM to categorize transactions and generate personalized financial insights.

SmartPark RL — Autonomous Parking Management — Python, Reinforcement Learning, NumPy, Matplotlib 2025

- Built a Q-Learning agent that autonomously navigates a grid-based parking lot, avoids obstacles, and selects the optimal parking space using reward-based learning with real-time visualization.

Share Market Analysis Bot — n8n, News API, Yahoo Finance API, AI 2025

- Generated market insights by integrating financial data from Yahoo Finance API and news sentiment using News API through automated workflows.

Electricity Consumption Study — Python, Matplotlib 2024

- Analyzed electricity usage data using Python and visualized trends to identify peak demand patterns.

Certifications

- AWS Certified Cloud Practitioner (CLF-C02)
- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- Microsoft Azure AI-900: Azure AI Fundamentals
- Front End Development – HTML (Great Learning)
